Scoring Procedures

Directions: If you checked *often* next to a question, it equals 5 points; *sometimes* equals 3 points; and *seldom* equals 1 point. Look at the 3 columns (Visual, Auditory, Tactile). Question #2 is under visual. Look at your response to question #2. If you checked *often*, write 5; if you checked *sometimes*, write 3; if you checked *seldom*, write 1. Do the same for the rest of the numbers in the columns. Be careful. They are not in order. Once you have completed recording the score, add the points in each column to obtain your preferred learning style.

If you are a **visual** learner, then by all means be sure that you look at all study materials. Use charts, maps, filmstrips, notes, and flashcards. Practice visualizing or picturing words/concepts in your head. Write out everything for frequent and quick visual review.

If you are an **auditory** learner, you may wish to use tapes. Tape lectures to help you fill in the gaps in your notes. But do listen and take notes, reviewing notes frequently. Sit in the lecture hall or classroom where you can hear well. After you have read something, summarize it, and recite it aloud.

If you are a **tactile** learner, trace words as you are saying them. Facts that must be learned should be written several times. Keep a supply of scratch paper for this purpose. Taking and keeping lecture notes will be very important. Make study sheets.
